

## **SUPPORTING PUPILS AT SCHOOL WITH MEDICAL CONDITIONS POLICY**

**Stonehill Avenue  
Birstall  
Leicestershire  
LE4 4JG**

This policy has been drawn up in accordance with the DfE guidance *Supporting pupils at school with medical conditions*.

This policy will be readily accessible to parents and school staff, and will be reviewed annually by the Headteacher to keep up-to-date with statutory and non-statutory guidance and legislation.

## **Purpose of policy:**

The purpose of this policy is to ensure arrangements are in place to support learners at school with medical conditions, in light of updated guidance drafted by the Department of Education for governing bodies of maintained schools and proprietors of academies in England.

This policy outlines the correct procedures and protocols ALP Leicester will follow to support learners with long-term and/or complex medical conditions, whilst safeguarding staff by providing clear and accurate guidance for all staff to adhere to.

## Aims:

- To ensure arrangements are made for children with medical conditions to receive proper care and support whilst meeting our legal responsibilities;
- To provide guidance to all teaching and non-teaching staff members, ensuring staff are fully supported in carrying out their role to support learners with medical conditions, including the procedure in an emergency situation;
- To identify the areas of responsibility and roles to all parties involved in the arrangements made to support learners at school with medical conditions, including learners, parents, staff, school nurses, Headteachers, Governing Bodies etc.; and
- To ensure procedures are followed to limit the impact of learners educational attainment, social and emotional wellbeing that can be associated with medical conditions, both on site and during off site trips.

## **Legislation Framework:**

This document replaces previous guidance on Managing Medicines in schools and early years published in March 2005.

Section 100 of the Children and Families Act 2014 places a duty on Governing Bodies to make arrangements for supporting learners with medical conditions at school. This is because learners with long-term and complex medical conditions may require:

- On-going support, medicines or care whilst at school to help them manage their condition;
- Monitoring and intervention in emergency circumstances.

The School must further comply with their duties under the Equality Act 2010 towards disabled children and adults.

## **Roles and Responsibilities:**

Supporting a child with a medical condition during school hours is not the sole responsibility of one person. Collaborative working between school staff, healthcare professionals, Local authorities, parents and learners will be critical to ensure that the needs of learners with medical conditions are met effectively.

Some of the most important roles and responsibilities at ALP Leicester are listed below, however this is not an exhaustive list:

The **Headteacher** is responsible for:

- ensuring all staff are aware of this policy;
- implementing this policy effectively and ensuring that **all** relevant staff members are aware of how to support learners with medical conditions including their role in its implementation;

- the development of individual healthcare plans (IHCP's);
- ensuring there are sufficient trained members of staff available to implement the policy and deliver against all IHCP, including in contingency and emergency situations;
- ensuring all staff who need to know are aware of the learners condition;
- safeguarding school staff by appropriately insuring them and making them aware that they are insured to support learners with medical conditions; and
- liaising with the school nursing service to inform them of a medical condition that has not yet been brought to their attention, which may require medical support at school.

**Responsible Person** are responsible for:

- supporting staff on implementing a child's individual healthcare plan and providing advice on training; and
- liaising with lead clinicians locally on appropriate support for the child and associated staff training needs.
- Notifying the school when a child has been identified as having a medical condition which will require support in school. This should, where possible, be done before the child starts at the school.

Suitable cover will be provided in the absence of the school nurse/healthcare professional.

**School staff** (teaching and non-teaching) should:

- Provide support to learners with medical conditions. Only trained staff are to administer medicines that are prescribed by a GP.
- Take into account the needs of learners with medical conditions that they teach.
- Receive sufficient and suitable training to achieve the necessary level of competency before they take on the responsibility to support children with medical conditions; and
- Know what to do and respond accordingly when they become aware that a learner with a medical condition needs help.

**Learners** should:

- Provide adequate information about how their condition affects them;
- Be fully involved in discussions about their medical support needs; and
- Comply with their IHCP.

**Parents** should:

- Provide medicine and equipment and ensure they or another nominated adult are contactable at all times;
- Provide sufficient and up-to-date information to the school about their child's medical needs; and
- Be involved and assist in drafting and developing their child's IHCP.

Other **healthcare professionals**, including GP's and providers of health services are responsible for:

- Notifying the school nurse when a child has been identified as having a medical condition that requires school support;
- Providing advice on developing healthcare plans; and
- Co-operating with schools that are supporting children with a medical condition.

**Local Authorities** (LA) are responsible for:

- Promoting cooperation between relevant partners such as governing bodies of maintained schools, proprietors of academies, clinical commissioning groups and NHS England, with a view to improving well-being of children so far as relating to their physical and mental health and their education, training and recreation;
- Provide support, advice and guidance, including suitable training for school staff to ensure that the support specified within the IHCPs can be delivered effectively;
- Working with schools to ensure that schools support learners with medical conditions to attend full time; and
- Making alternative arrangements where learners would not receive a suitable education in a mainstream school because of their health needs when it is clear that a child will be away from school for 15 days or more because of their health needs.

#### **Procedure when the school is notified of a medical condition:**

- It will either be the school nursing service, a healthcare professional, GP or paediatrician who will notify the school nurse when a learner has been identified as having a medical condition that requires support.
- The nurse will then notify the Headteacher who should take the necessary steps to coordinate a meeting to discuss the learners medical support needs. The meeting will involve key school staff, the learner, parents, relevant healthcare professionals and other medical/health clinicians as appropriate.
- A decision will be made as to whether an IHCP will be created for the learner.
- For children new to the school, support arrangements will be in place in time for the start of the relevant school term.
- In cases where the learner moves to the school mid-term or receives a new diagnosis, the school will make every effort to ensure the arrangements are in place within two weeks.
- The school will not have to wait for a formal diagnosis before providing support to learners. In cases where a learners medical condition is unclear, or where there is a difference of opinion, judgements will be made about what support to provide based on available medical evidence and through consultation with parents.

#### **Individual Healthcare Plans (IHCP):**

A learners IHCP provides clarity about what needs to be done, when and by whom. When deciding whether an IHCP is appropriate and proportionate, schools should follow the steps below:

##### Stage 1 – Gathering the information

- The Headteacher or senior member of staff coordinates a meeting between the school, healthcare professional and parent to discuss the medical support needs of the learner.
- Learners should be involved when possible.
- The meeting should ascertain whether an IHCP is appropriate, as not all learners will require one.
- All parties should agree, based on the evidence, as to whether an IHCP would be suitable. However, the Headteacher is best placed to take the final view if consensus cannot be reached.
- The decision should be based on:
  - whether there is a high risk that emergency intervention will be needed;

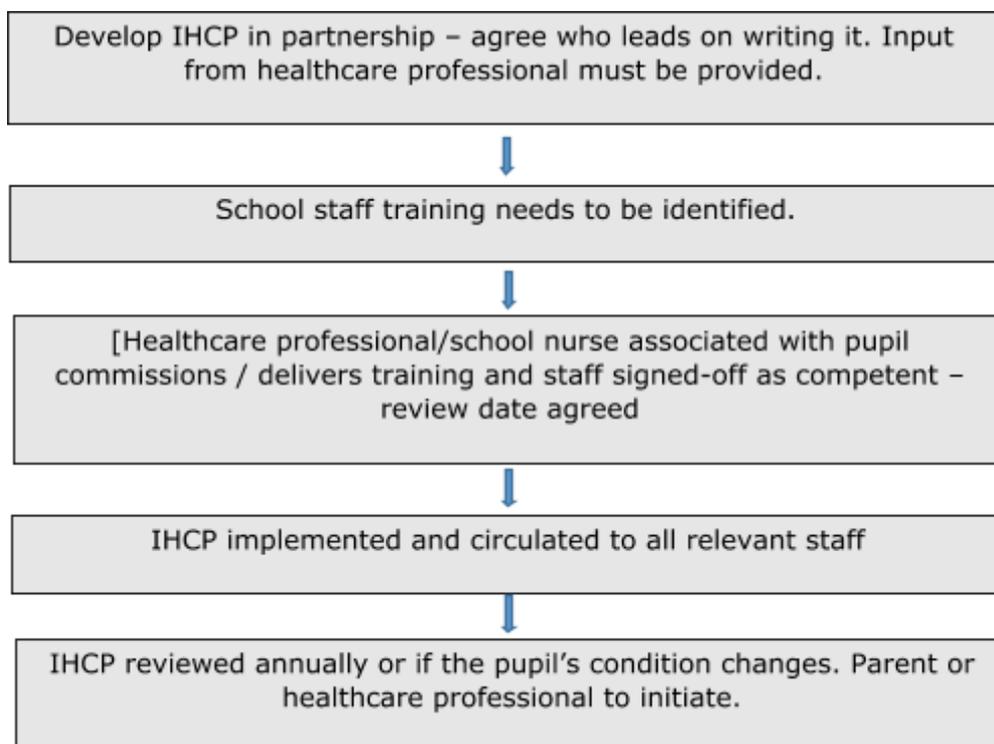

- whether the medical condition is long-term and/or complex;
- whether the learner is returning to school following a period of hospital education or alternative provision (including home tuition);
- whether medical conditions are likely to fluctuate.

**A member of the school staff should be identified as being the person who will provide support to the learner.**

### Stage 2: Developing an IHCP

The purpose of an IHCP is to capture steps which the school will take to help the child manage their condition and overcome any potential barriers to getting the most from their education.

Once the decision has been made to create an IHCP the outlined process should be followed: See appendix [A] for the schools IHCP.

### **Emergency Process:**

As part of general risk management processes, ALP Leicester has the following arrangements in place for dealing with emergencies situations:

- All learners in the school should inform a teacher immediately if they think help is needed;
- The learners IHCP will clearly define what constitutes an emergency and will explain what to do, including ensuring that all relevant staff are aware of the emergency symptoms and procedures for the individual learner;
- When a learner needs to be taken to hospital, staff will stay with the child until the parent arrives. If a child is taken to hospital by ambulance, staff will accompany the learner;

All staff need to understand the local emergency services cover arrangements and ensure that the correct information is provided for navigation systems.

### **Staff training and support:**

ALP Leicester will provide the following support to all staff involved in supporting learners with medical needs:

- Any member of school staff providing support to a learner with medical needs will receive suitable training. Staff training needs will be identified during the development or review of the learners IHCP. Staff who already have some knowledge of the specific support needed by a child with a medical condition may not require extensive training.
- Staff who provide support to learners with medical conditions will, when possible, be included in the meetings where this is discussed.
- The [HEALTHCARE PROFESSIONAL/SCHOOL NURSE associated with learner] will lead on identifying and agreeing with the school the type and level of training required. It will be the school's responsibility to arrange training and ensure that this remains up-to-date.
- The training will be sufficient to ensure all staff are competent and have confidence in their ability to support learners with medical conditions, and to fulfil the requirements set out in the IHCP.
- Staff will be made aware of the specific medical conditions they are being asked to deal with, their implications and preventative measures.

**Staff must not give prescription medicines or undertake health care procedures without appropriate training (including amendments to the IHCP). A first-aid certificate does not constitute appropriate training in supporting children with medical conditions.**

- The Healthcare Professional, including the responsible person, will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.
- As well as individual training, the school will make arrangements for whole school awareness training and induction arrangements for new members of staff. This will include preventative and emergency measures so that staff can recognise and act quickly when a problem occurs.

### **Learners role in managing their own medical needs:**

Learners may be competent to manage their own health needs and medicines. ALP Leicester will discuss individual competencies with parents and ensure the IHCP reflects the learners competencies for managing their own medicines and procedures.

Competent learners will be allowed to carry specific medications and relevant devices, such as inhalers and epi pens, or will have support to access their medicines from a locked cupboard in the first aid room for self-medication quickly and easily, wherever possible. Learners who can take their medicines themselves may require an appropriate level of supervision. When it is not appropriate for the learner to self-manage, trained staff will help to administer medicines and manage procedures for them.

If a learner does refuse to take their own medicine, or refuses to carry out necessary procedures relating to their medical needs, staff will not force them to do so, but will follow the procedure agreed within the learners IHCP. Julie Rawle/ Kate Shaw will be responsible for informing the learners parents, so that alternative options can be considered for future situations.

### **Record keeping and managing/storing of medicines:**

### Record Keeping:

Written records of all medicines administered to individual children will be kept at School locked first aid room detailing what, how and how much was administered, when and by whom.

These accurate records offer protection to staff and children, whilst providing evidence that agreed procedures have been followed.

Parents will be informed when their child has been unwell at school by Julie Rawle/Kate Shaw

### Managing medicines on school premises:

In order to manage learners' medical conditions effectively, ALP Leicester will not prevent learners from eating, drinking or taking breaks when required.

The following procedures will be followed to manage medicines on-site:

- a learner under 16 should never be given prescribed or non-prescribed medicines without their parent's written consent. See appendix B for the schools parental agreement for administering medicine;
- only prescribed medicines that are in-date, labelled and include instructions for administration, dosage and storage will be accepted by the school. In most circumstances, the medicines should be provided in the original container and dispensed by a pharmacist, with the exception of insulin, which will be inside an insulin pen or pump;
- all medicines will be stored safely. Children must know where their medicines are kept, and be able to access them immediately. Where relevant, children should be made aware that Donna Hatcher/Kyle Spencer holds the key to the storage facility;
- a learner who has been prescribed a controlled drug may legally have it in their possession if competent to do so, but must not pass it to another child for use, as this is an offence. ALP Leicester will otherwise keep controlled drugs that have been prescribed for a learner securely stored in a non-portable container at cupboard in the first aid room and only Donna Hatcher/Kyle Spencer will have access;
- controlled drugs will be easily accessible in an emergency at all times

### Storage/Disposal of Medicines:

Learners medicine will be locked away out of the learners access; this is especially important on school trips. It is the responsibility of the School to return medicines that are no longer required, to the parent for safe disposal.

### **Off-site procedure:**

ALP Leicester will assess what reasonable adjustments can be made to enable learners with medical needs to participate fully and safely during off-site trips.

All staff members should be aware of how the learners individual medical condition will impact their participation, but should allow enough flexibility for learners to participate according to their own abilities, unless evidence from a GP states otherwise.

A risk assessment will be carried out by James Kilby prior to the off-site trip taking place to ensure learners with medical conditions can participate safely. This will require consultation with parents and learners and advice from the relevant healthcare professionals.

**Unacceptable practice:**

Staff should use their discretion and judge each case on its merits with reference to the child’s IHCP. However, it is not general acceptable practice to:

- assume that every child with the same condition requires the same treatment;
- prevent children from accessing their inhalers or medication easily, and administering their medication when and where necessary;
- if the learner becomes ill, send them to the school medical room unaccompanied or with someone unsuitable;
- send learners with medical conditions home frequently or prevent them from participating in normal school activities, unless specified in their IHCP.
- penalise learners for their attendance record if absences relate to their medical condition i.e. hospital appointments;
- ignore the views of the learner or their parents; or ignore medical evidence or opinion, (although this may be challenged);
- prevent children from drinking, eating or taking toilet breaks whenever they need to in order to manage their medical condition effectively;
- create barriers to learners participating in any aspect of school life, including off-site school trips; or
- require parents to attend school to administer medication or provide medical support to their child.

No parent should have to give up working because ALP Leicester is failing to support their child’s medical needs.

**Insurance/Complaints procedure:**

Insurance/ Indemnity:

The school provides the appropriate level of insurance to cover staff providing support to learners with medical conditions. The schools insurance arrangements are Public, Products & Employer’s liability policy number 7Y0920GLA140 insured through NOVEA and is accessible from Naagii Lamjav.

The schools insurance policy covers liability relating to the administration of medication.

Complaints:

Should parents or pupils be dissatisfied with the support ALP Leicester has provided, the initial concern should be raised with Julie Rawle/Kate Shaw If the concern cannot be resolved with the school directly, a formal complaint can be made via the schools complaints procedure, which is accessible from <http://www.alpleicester.co.uk/policies/>

Making a formal complaint to the Department for Education should only occur if it comes within scope of section 496/497 of the Education Act 1996 and after the above attempts at resolution have been exhausted.

**Supporting Pupils at School with Medical Conditions Policy Declaration:**

By signing this form you are acknowledging that you have read and understood the policy and procedures in place by the school to support pupils with medical conditions.

Appendix B: Parental agreement for school to administer medicine.

**Parental agreement for ALP Leicester to administer medicine**

I understand that I must deliver the medicine safely to ALP Leicester

The above information is, to the best of my knowledge, accurate at the time of writing and I give consent to **appropriately trained** school staff administering medicine in accordance with the school policy. I will inform the school immediately, in writing, if there is any change in dosage or frequency of the medication or if the medicine is stopped.
